## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I**, claim(s) 2-6 and 8-21, drawn to a method to improve plant growth characteristics wherein the CCS52 protein is a CCS52A protein, a genetic construct, a host cell, a plant, plant part and progeny.

**Group II**, claim(s) 2-5 and 7-21, drawn to a method to improve plant growth characteristics wherein the nucleic acid encoding the CCS52 protein is represented by SEQ ID NO:1 or a variant thereof, or wherein the CCS52 protein is represented by SEQ ID NO:2 or a variant thereof, a genetic construct, a host cell, a plant, plant part and progeny.

**Group III**, claim(s) 2-5 and 7-21, drawn to a method to improve plant growth characteristics wherein the nucleic acid encoding the CCS52 protein is represented by SEQ ID NO:3 or a variant thereof, or wherein the CCS52 protein is represented by SEQ ID NO:4 or a variant thereof, a genetic construct, a host cell, a plant, plant part and progeny.

**Group IV**, claim(s) 2-5 and 7-21, drawn to a method to improve plant growth characteristics wherein the nucleic acid encoding the CCS52 protein is represented by

SEQ ID NO:5 or a variant thereof, or wherein the CCS52 protein is represented by SEQ ID NO:6 or a variant thereof, a genetic construct, a host cell, a plant, plant part and progeny.

Claim 1 link(s) inventions I-IV. The restriction requirement between the linked inventions is **subject to** the nonallowance of the linking claim(s), claim 1. Upon the indication of allowability of the linking claim(s), the restriction requirement as to the linked inventions **shall** be withdrawn and any claim(s) depending from or otherwise requiring all the limitations of the allowable linking claim(s) will be rejoined and fully examined for patentability in accordance with 37 CFR 1.104 **Claims that require all the limitations of an allowable linking claim** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

Applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, the allowable linking claim, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking the inventions of Groups I-IV is a nucleic acid encoding the CCS52 protein. However, a nucleic acid encoding the CCS52 protein is obvious or anticipated over CEBOLLA A. et al. (The mitotic inhibitor *ccs52* is required for endoreduplication and ploidy-dependent cell enlargement in plants. EMBO J. 1999 Aug 16;18(16):4476-84, Applicant's search report), and therefore does not constitute a special technical feature as defined by PCT Rule 13.2, because it does not define a contribution over the prior art.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
